        Video provides a powerful way to help you prove your point. When you click Online Video, you
        can paste in the embed code for the video you want to add. You can also type a keyword to search
        online for the video that best fits your document.
        To make your document look professionally produced, Word provides header, footer, cover page, and
        text box designs that complement each other. For example, you can add a matching cover page, header,
        and sidebar. Click Insert and then choose the elements you want from the different galleries.
    </p>

    <p>Themes and styles also help keep your document coordinated. When you click Design and choose a
    new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you
    apply styles, your headings change to match the new theme.
    Save time in Word with new buttons that show up where you need them. To change the way a picture
    fits in your document, click it and a button for layout options appears next to it. When you work on
    a table, click where you want to add a row or a column, and then click the plus sign.
    Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on
    the text you want. If you need to stop reading before you reach the end, Word remembers where you
    left off - even on another device.

    <p>My house is a two storied building in the heart of the city. I feel lucky enough to have a
    house
        and all other facilities. The house is newly built by my father. Before the first floor was
        constructed we used to live on the ground floor. We have a drawing room, a
    <a href="guest.html"> guest room</a>, two
        bed rooms & <p><a href="bathroom.html"> two bathrooms </a> attached with a Puja room. My
    house is beautifully decorated by my mother.
